## Installation

Connect PDA with WindowCE 2.XX or WindowCE 3.XX to your Desktop PC.

Download the zipped program file to a specific directory and then run setup file.

The setup program will be proceeded on the Desktop PC and then, you can install Power Grip on PDA by direction displayed on screen.

Power Grip icon will be displayed on the screen if the installation has been successfully completed. You can start the program by clicking on the Power Grip icon.

### Notice)

To install Power Grip, you need at least 1.8MB run time memory in the platform. If you see the error message as below:  
"There is not enough free disk space on the mobile device",  
please close other running tasks(other programs)  
to increase the program memory size  
and Power Grip will be installed successfully.

## Playing the Game

### Title board

- Single Player : One player mode
- Double Player : Two player mode
- High Score : List top five scorer's name and points
- Exit : Exit the game

### Bowler Select

You can choose either single player or double player mode.

- Single Mode  
You can select a Female or a Male player by click. A selected player will be highlighted. Then, press 'GO' button to start.
- Double Mode  
You must select both of two players. Then, press 'GO' button.

## Playing the Game

### Playing Board

#### Score Panel

If you click anywhere of upper screen, the score board will be shown up, and if you click the board, it will disappear. (You can check the score board anytime during the game.)

#### Bowler Control

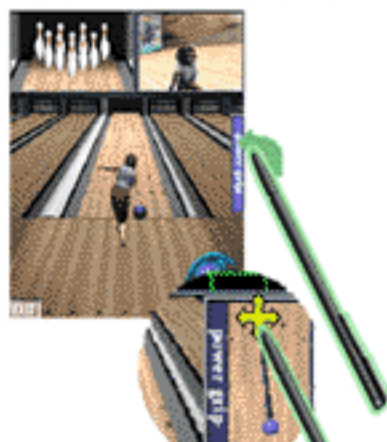

You can decide a spot to throw the ball by dragging the player.

## Playing the Game

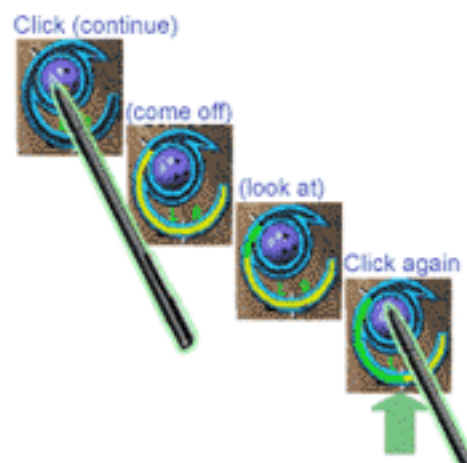

### Playing Board

#### Direction Panel to decide direction

To decide a direction of the ball, use the panel on right hand side of screen, says "Power Grip". If you click again the bar "Power Grip", the panel will disappear, and click it once again, it will be shown up again.

### Throwing Panel

This is a panel to control ball speed and spin. If you click and hold the panel, a gauge of power will go up.

After you decide power (upper is stronger) by release of holding,

To decide ball spin, you must find out a tiny bar divides the marks, "L" and "R" in the bottom of the panel. automatically the gauge will go down, then you must decide degree of spin. If you click again when the going down gauge is exactly at the tiny bar, the gauge will be stop and the ball will go straight. However, if you make the gauge stop at 'L' side of the panel, the ball will be spun to the left hand side of pins, and so does 'R' side of panel.

Stopping the gauge at further spot from the tiny bar, you can throw the ball in stronger spin for either left or right hand side.

If direction, power, and spin of ball are harmonized, you can make a excellent strike.

## Playing the Game

### HighScore Board

Grade	Name	Average
1	pizooz	275
2	sunny	265
3	flux2game	243
4	tenkou	237
5	amurtaat	210

Current Score	
VisualBard	178
topgrow	165
