Play WV Runes

The Rune Stones

The game has nine types of rune stones, which differ in shape and color:

The Board

The board contains 64 rune stones of several different types, depending on the difficulty of level you are playing. You must look for configurations of identical stones, suitable to form rows or columns of three or more stones with a complement from the store. You earn points each time such a row or column is formed.

The Store

The store is in the left part of the field and contains eight rune stones. Tap a stone to select it so as to match certain configuration from the board. Then tap the stone on the board, which you wish to replace with the one from the store. The red square highlights the selected stone. Try to keep that selection at a fixed position and you will get a premium coefficient and will score more points. Keep track of the coefficient in the upper left corner of the screen.

Scoring

In this game you will find two records of the best scores – one for timed game and the other for relaxing game. Think ahead to score higher bonus, and cause chain reactions by hitting multiple sets with one move. To view scores go to **Menu|Game|High Score** or **Menu|Game|High Score for timed game** and the following screen will appear:

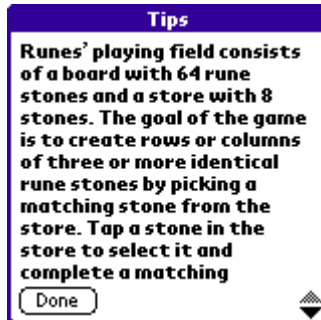

Tap **OK** to exit this screen.
